

Andrews Fasteners in-house inspection equipment

TENSION & COMPRESSION MACHINE

The machine can test from M12 diameter to M30 diameter grade 8.8 fasteners to destruction

External threaded fasteners are pulled until they break in accordance with the relevant standards (BS EN 15048-2 (suitability test), BS EN 14399, BS EN ISO 898-1, etc.)

Internal threaded fasteners are compression tested (proof load) in accordance with relevant standards (BS EN 14399, BS EN 20898-2, DIN 267 etc).

HARDNESS MACHINE

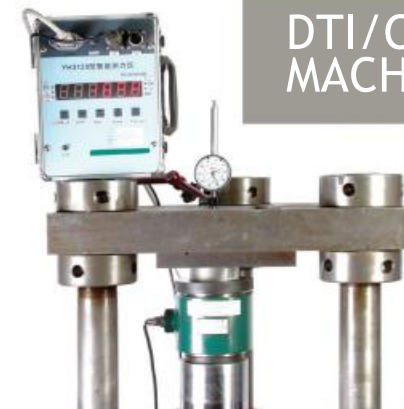

For hardness testing fasteners in accordance with the relevant standards (BS EN ISO 898-1, BS EN 20898-2, BS EN 14399, BS 3692 etc).

SUITABILITY TEST MACHINE

Meets the requirements of BS EN 14399 PT 2 for assembled preloaded fasteners.

DTI/CLI TESTING MACHINE

This Machine is used for testing DTI/CLI's in accordance with BS EN 14399-9, BS 7644 and ASTM F959M.

EXTRA CARE - QUALITY ASSURED FOR OUR CUSTOMERS
